DETAILED ACTION

1. The amendment of 30 March 2009 has been noted and made of record.
2. Claims 1-13 have been presented for examination.

Response to Arguments

3. Applicant's arguments, see pages 8-13, filed 30 March 2009, with respect to the prior art rejections have been fully considered and are persuasive. The prior art rejections of claims 1-13 have been withdrawn.

Allowable Subject Matter

4. Claims 1-13 are allowed.
5. The following is an examiner's statement of reasons for allowance:

As noted above, the examiner agrees with the applicant's arguments that the prior art does not teach a single bit associated with each of the sectors that indicates whether the data is to be encrypted prior to being transmitted over a bus. The examiner was unable to find any teaching, suggestion, or motivation that would render the above limitation obvious. Therefore, claims 1-13 are novel and not obvious.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2439

8. The following patents are cited to further show the state of the art with respect to bus encrypting data read from a record carrier, such as:

United States Patent Application Publication No. 2006/0239462 A1 to Staring et al., which is cited to show a related application that discloses the claimed invention.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christian LaForgia whose telephone number is (571)272-3792.

The examiner can normally be reached on Monday thru Thursday 7-5.

10. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edan Orgad can be reached on (571) 272-7884. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

11. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
